

EASY TO USE

# EFFECTIVE RIGHT FROM THE START

Xypex Admix meets the challenges of water, chemicals and a wide variety of harsh environments before they become problems. Blended into the concrete at the time of batching, Admix reduces concrete's permeability and enhances its durability right from the start.

It outperforms other waterproofing methods because of its unique ability to become a truly integral part of the concrete matrix.

Bringing Xypex Admix and concrete together is easy. Manufactured in a powder form, Xypex is available in a number of different sizes and packages, all designed to make the mixing process as convenient and

easy as possible for the concrete producer. Our new water soluble bags mean a dust-free environment—worker safe and easy to use. Bag and all go into the mix.

Xypex has no negative effect on concrete. The strength, slump, air-entrainment and workability of the concrete remains as formulated in the mix design. With Xypex Admix inside, concrete is still handled, placed, finished and cured as usual. In other words, concrete containing Xypex Admix still behaves like concrete.

Xypex products and technology have demonstrated their worth and integrity in projects around the world. A valuable mix for concrete producers.

## XYPEX ADMIX SERIES MEETING CUSTOMER NEEDS

The Xypex Admix Series has been formulated to meet varying concrete practices, mix designs and project requirements. Xypex Admix is available in three forms:

### ADMIX C-500

Xypex Admix C-500 meets modern concrete practices that incorporate additives such as fly ash and slag.

### ADMIX C-1000

Xypex Admix C-1000 is designed for typical Portland cement-rich concrete.

### ADMIX C-2000

Xypex Admix C-2000 is designed for projects where extended set times are required.

Xypex Admix is also available in a No Fines (NF) grade.

## EASY TO INSTALL EASY TO USE

Xypex Admix is now available in soluble bags as well as standard pails and bags. Our new water-soluble bags are easy to use, worker-safe and provide greater control over the admix/cement ratio.

**Beingthere** IN PROJECTS AROUND THE WORLD, XYPEX HAS PROVEN ITSELF FOR OVER 30 YRS.
